

Objective

2nd year CS Ph.D. student in Computer Vision looking for Summer 2025 internship.

Education

Ph.D., Computer Science, Texas A&M University, GPA: 4.0	2023 - now
M.S., Computer Science, Texas A&M University, GPA: 4.0	2020 - 2023
M.S., Petroleum Engineering, Texas A&M University, GPA: 3.9	2016 - 2019
B.S., Petroleum Engineering, China University of Petroleum Beijing, GPA: 3.8	2011 - 2015

Internship/Work Experience

System Software Intern, Storage Arcus and Primera Stack Team, HPE, Houston, Texas Summer 2021, 2022

- Developed efficient tools (C) for searching structs and mapping admin space using page table walking
- Improved usage and efficiency (15× faster) of multiple Python extensions for faster debugging (C, Python)

Field Engineer, Measurements While Drilling Services, Schlumberger, Houston, Texas 2019 - 2020

- Operated downhole tools to measure wellbore directions and interpret formation Gamma data for well placement

Research Experience

- **Computer vision (focus):** adapt *Vision-Language Models* to downstream tasks in zero-shot and few-shot setup
- **Cyber-physical system:** computer vision for precision irrigation, voice assistant for emergency medical services
- **Applied machine learning:** apply machine learning to solve healthcare and geoscience problems

Graduate Research Assistant, Computer Vision Lab, TAMU, by Prof. Shu Kong 2023 - now

- Analyzed failures of SOTA multimodal systems (e.g. GPT-4V); exposed imbalanced concept distribution in pretraining data; proposed REtrieval-Augmented Learning (REAL) for improving VLMs' zero-shot recognition
- Explored retrieval-augmented learning for few-shot recognition using VLMs; proposed Stage-Wise Augmented fineTuning (SWAT) to mitigate the imbalanced distribution and domain gaps issues, outperforming SOTA by >10%

Graduate Research Assistant, Embedded & Networked Sensor System Lab, TAMU, by Prof. Radu Stoleru 2020 - 2023

- Developed precision irrigation system on Raspberry Pi 4 by estimating hyperlocal rainfall from doorbell cameras
- Developed end-to-end mobile voice assistant system to assist emergency medical services during disaster response

Graduate Research Assistant, Information & Operation Management Dept, TAMU, by Prof. Esmaeil Keyvan 2023 - now

- Developed safe reinforcement learning algorithm for personalized medicine; tested on 12,501 ACCORD patients
- Developed Weibull and Cox-PH survival models for estimating CVD Risk using All-of-Us dataset (23,795) patients

Selected Awards

- TAMU CSE Department Travel Grant, 2024
- TAMU CSE Department Graduate Teaching Assistant Excellence Award (1 each year), 2024
- 1st place of SPE Student Paper Contest in TAMU, 1st place in Gulf Coast Region, 3rd place in Global, 2018
- National Scholarship (highest honor in China), 2012
